

Miguel Osorno

Frontend Developer

miguelangel.osornolinares@gmail.com

Currently, I work as fullstack developer in a Startup, I have been a developer for more than 4 years. I have worked with companies that are very different each other, for instance, I have worked with a consultancy and I was in charge of developing some websites. After that I was working with a company about social network and I learned many things about this sector that is very interesting. Now I am working with people that are creating a new espresso machine that will allows making coffee in ways never seen before.

My strengths are the next, I am a very curious person because in free time I really like learning new technologies just for fun even if I do not use it in my daily work, I consider myself an intelligent and fast learning person because sometimes some things that are very complicated I can understand it in a sort time.

On the other hand, I have some goals in my career for example I would like to have a high position like CTO. Talking about my personal life, I would like to live in another country for a while to meet new people and learn about a new culture.

Finally, I am always learning new things to improve my skills. In my free time, I like playing videogames with my friends and listening to music.

Technical Skills

- ReactJs
- NextJs
- Redux
- Redux Toolkit
- Javascript
- HTML5
- CSS3
- Bootstrap
- TailwindCss
- NodeJs
- Express

- Postgresql
- Sequelize
- Git / Github
- Docker

Work Experience

Fuego - Meticulous Home (Oct 2022- Currently)

Full-Stack

Company dedicated to product design.

Projects: Dashboard,

Barometer. (<https://www.kickstarter.com/projects/meticulous/meticulous-espresso>).
