Miguel Osorno

Full-Stack Software Developer

miguelangel.osornolinares@gmail.com | miguelosorno.com | github.com/MiguelOsorno | LinkedIn

PROFILE

Full-stack developer with 7+ years of experience building web products end to end, from polished, responsive interfaces to the APIs behind them. I've worked across very different industries: a software consultancy, a social network that connects creators with fans, the software for Meticulous, a smart espresso machine, and today a real estate intelligence platform at Datoz, where I integrate LLMs and ship features that turn complex data into clear decisions.

EXPERIENCE

Datoz

Oct 2024 - Present

Real estate intelligence platform

- Integrated LLMs with prompt and token optimization strategies, cutting context usage by 20% while keeping answers accurate.
- Implemented analytics and event tracking to drive product and UX decisions.
- Shipped new features for the internal operations application.
- Refined the UI layout and information hierarchy so key metrics are easier to scan and users stay oriented in complex workflows.

Freelance

Oct 2024 - Apr 2025

No-code site builder

- Added new modules to the low-code platform, enabling new workflows without extra engineering effort.
- Delivered theme-based style customization so teams can launch brand-consistent pages in minutes.

Fuego - Meticulous

Oct 2022 - Oct 2024

Software for Meticulous, a smart espresso machine

- Designed animations and transitions for a smooth, intuitive experience across components and screens.
- Integrated WebSockets to display real-time machine data.
- Built responsive layouts for mobile, tablet and desktop, and a dashboard prototype.
- Optimized components to improve rendering performance.
- Integrated Firebase and Redux Toolkit for authentication and global state.
- Set up GitHub Actions pipelines to publish packages to npm.

Stack: React, Next.js, Electron, Node.js, Redux Toolkit, Firebase, Sass, Docker

Freelance

Jan 2024 - Mar 2024

Online marketplace MVP

- Implemented the shopping cart and order management flow.
- Built the product feed to browse available items.
- Created the orders section to track pending, paid and canceled orders.

Priv Social Inc

Feb 2021 - Oct 2022

Social network that connects creators with fans

- Rebuilt the website from scratch.
- Built a landing page that increased platform revenue by $20K USD per month.
- Integrated payment processors (PayPal, Conekta), increasing monthly revenue by 10%.
- Developed new flows that unlocked features unavailable in the previous version, such as a notification system.
- Integrated third-party services (Intercom, Google Analytics, Algolia).
- Set up repository tooling and conventions (Prettier, Commitizen, semantic-release).

Stack: React, Next.js, Node.js, Express, MongoDB, PostgreSQL, Tailwind CSS

Stackcode

Dec 2019 - Feb 2021

Software consultancy

- Built a restaurant dashboard to manage orders and customers.
- Built WordPress websites that helped businesses such as optical stores and real estate agencies reach more customers.
- Built a responsive website for a construction company with AJAX-powered contact forms.
- Developed the front-end layout for a delivery website with Angular 8.

Stack: Angular, AngularJS, Node.js, MySQL, WordPress, HTML5, CSS3

SKILLS

Front-end: JavaScript, React, Next.js, Redux / Redux Toolkit, Angular, HTML5, CSS3, Sass, Tailwind CSS, Bootstrap, Electron

Back-end: Node.js, Express, Sequelize, Firebase

Databases: PostgreSQL, MongoDB, MySQL

Other: LLM integration, product analytics, Docker, Git / GitHub, GitHub Actions, WordPress

EDUCATION

B.S. in Computer Systems Engineering

Sep 2017 - Apr 2020

Instituto de Estudios Superiores de Chiapas

LANGUAGES

Spanish: Native

English: Upper intermediate (B2)

Korean: Elementary
